Summary of Items Observed:

On this date Caltrans OSM Quality Assurance Inspector (QA Inspector) George Goulet was present during the times noted above for observations relative to the work being performed.

OBG Trial Assembly Area

This QA Inspector randomly observed no welding related work in progress in the OBG Trial Assembly Area.

Match drilling operations were being performed on various OBG splice plates and through previously drilled holes in OBG segment 12AE bottom plate, between panel point 110 and panel point 111, and into the bottom plate of the FL3 section, all using magnetically-attached drill presses.

ZPMC workers performing jacking operations under the bottom plate of OBG PCMK segments 12AW and 12 BW.

A transport/lift vehicle appeared to be bracing up the FL3 area of segment 12 AW. See photo below.

Heavy Dock

This QA Inspector randomly observed no apparent work being performed on the Heavy Dock.

Unless otherwise noted, all work observed on this date appeared to generally comply with applicable contract documents.

WELDING INSPECTION REPORT
